Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 453/2010

# SAFETY DATA SHEET

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Product name	Alphasyn T 150
Product code	451120-FR01
SDS no.	451120
Product type	Liquid.
1.2 Relevant identified uses of	the substance or mixture and uses advised against
Use of the substance/	Gear lubricant
mixture	For specific application advice see appropriate Technical Data Sheet or consult our company representative.
1.3 Details of the supplier of the	e safety data sheet
Supplier	BP Middle East
	Standard Chartered Tower
	8th Floor, Down Town Burj Khalifa
	By Emaar Square
	P.O. Box 1699, Dubai, United Arab Emirates
	Main : (971) 4 331 7999
	Fax : (971) 4 331 8530
E-mail address	MSDSadvice@bp.com

1.4 Emergency telephone number	
--------------------------------	--

EMERGENCY	Carechem: +44 (0) 1235 239 671 (Arabic language 24/7) +44 (0) 1235 239 670 (English
TELEPHONE NUMBER	language 24/7)

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Aquatic Chronic 3, H412

R52/53

Classification according to Directive 1999/45/EC [DPD]

The product is classified as dangerous according to Directive 1999/45/EC and its amendments.

Classification

**Environmental hazards** Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

See Section 16 for the full text of the R phrases or H statements declared above.

See sections 11 and 12 for more detailed information on health effects and symptoms and environmental hazards.

2.2 Label elements				
Signal word	No signal word.			
Hazard statements	H412 - Harmful to aquatic life with long lasting effects.			
Precautionary statements				
Prevention	P273 - Avoid release to the environmer	ıt.		
Response	Not applicable.			
Storage	Not applicable.			
Disposal	P501 - Dispose of contents and contain international regulations.	er in accordance wi	th all local, regional, r	national and
Supplemental label elements	Contains N-1-naphthylaniline. May proc	duce an allergic rea	ction.	
Special packaging requirement	<u>nts</u>			
Product name Alphasyn T 150		Product code	451120-FR01	Page: 1/10
Version 11. Date of issue 1 02	2 December 2014 Fo	rmat Rest of World	Language	ENGLISH

(Rest of World)

# **SECTION 2: Hazards identification**

Containers to be fitted with child-resistant fastenings	Not applicable.
Tactile warning of danger	Not applicable.
2.3 Other hazards	
Other hazards which do not result in classification	Defatting to the skin. Note: High Pressure Applications Injections through the skin resulting from contact with the product at high pressure constitute a major medical emergency. See 'Notes to physician' under First-Aid Measures, Section 4 of this Safety Data Sheet. Experimental data on one or more of the components has been used to determine all or part of the hazard classification of this product.

### **SECTION 3: Composition/information on ingredients** Mixture

Substance/mixture

Synthetic base stock. Proprietary performance additives.

			<u>Classification</u>			
Product/ingredient name	CAS no.	%	67/548/EEC	Regulation (EC) No. 1272/2008 [CLP]	Туре	
tris(methylphenyl) phosphate	1330-78-5	≥1 - <3	Repr. Cat. 3; R62 N; R50/53	Repr. 2, H361f (Fertility) (oral) Aquatic Acute 1, H400 Aquatic Chronic 1, H410	[1]	
n-phenyl-1-naphthylamine	90-30-2	≥0.3 - <1	Xn; R22, R48/22 R43 N; R50/53	Acute Tox. 4, H302 Skin Sens. 1, H317 STOT RE 2, H373 (blood system) (oral) Aquatic Chronic 1, H410	[1]	

### See Section 16 for the full text of the R-phrases declared above.

See Section 16 for the full text of the H statements declared above.

#### Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.
Skin contact	Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.
Inhalation	If inhaled, remove to fresh air. Get medical attention if symptoms appear.
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Get medical attention if symptoms occur.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

### 4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

#### 4.3 Indication of any immediate medical attention and special treatment needed

Product name	Alphasyn T 150		Product code 451120	-FR01	Page: 2/10
Version 11. 02	Date of issue 12 December 2014	Format	Rest of World	Language	ENGLISH
02			(Rest of World)		

Notes to physician	Treatment should in general be symptomatic and directed to relieving any effects. Note: High Pressure Applications Injections through the skin resulting from contact with the product at high pressure constitute a major medical emergency. Injuries may not appear serious at first but within a few hours tissue becomes swollen, discoloured and extremely painful with extensive subcutaneous necrosis. Surgical exploration should be undertaken without delay. Thorough and extensive debridement of the wound and underlying tissue is necessary to minimise tissue loss and prevent or limit permanent damage. Note that high pressure may force the product considerable distances along tissue planes.
--------------------	--

5.1 Extinguishing media				
Suitable extinguishing media	Use foam or all-purpose dry chemical to extinguish.			
Unsuitable extinguishingDo not use water jet.media				
5.2 Special hazards arising fro	om the substance or mixture			
Hazards from the substance or mixture	In a fire or if heated, a pressure increase will occur and the container may burst.			
Hazardous combustion products	Combustion products may include the following: carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide) phosphorus oxides			
5.3 Advice for firefighters				
Special precautions for fire-fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. This material is harmful to aquatic organisms. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.			
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.			

# SECTION 6: Accidental release measures

6.1 Personal precautions, protect	ctive equipment and emergency procedures
For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Avoid breathing vapour or mist. Provide adequate ventilation. Put on appropriate personal protective equipment. Contact emergency personnel.
For emergency responders	Entry into a confined space or poorly ventilated area contaminated with vapour, mist or fume is extremely hazardous without the correct respiratory protective equipment and a safe system of work. Wear self-contained breathing apparatus. Wear a suitable chemical protective suit. Chemical resistant boots. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.
6.3 Methods and material for co	ntainment and cleaning up
Small spill	Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Contaminated absorbent material may pose the same hazard as the spilt product. Dispose of via a licensed waste disposal contractor.

Product name Alphasyn T 150		Product code 451120	)-FR01	Page: 3/10
Version 11. 02	Date of issue 12 December 2014	Rest of World (Rest of World)	Language	ENGLISH

### SECTION 6: Accidental release measures

6.4 Reference to other sections	See Section 1 for emergency contact information. See Section 5 for firefighting measures. See Section 8 for information on appropriate personal protective equipment. See Section 12 for environmental precautions.
	See Section 12 for additional waste treatment information.

### SECTION 7: Handling and storage

7.1 Precautions for safe har	ndling
Protective measures	Put on appropriate personal protective equipment. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Avoid contact of spilt material and runoff with soil and surface waterways. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Do not reuse container. Empty containers retain product residue and can be hazardous.
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
7.2 Conditions for safe storage, including any incompatibilities	Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep away from heat and direct sunlight. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store and use only in equipment/ containers designed for use with this product. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
Not suitable	Prolonged exposure to elevated temperature.
7.3 Specific end use(s)	
Recommendations	See section 1.2 and Exposure scenarios in annex, if applicable.

### **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### **Occupational exposure limits**

No exposure limit value known.

No exposure limit value known.

Whilst specific OELs for certain components may be shown in this section, other components may be present in any mist, vapour or dust produced. Therefore, the specific OELs may not be applicable to the product as a whole and are provided for guidance only.

Recommended monitoring procedures

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

### Derived No Effect Level

No DNELs/DMELs available.

### Predicted No Effect Concentration

No PNECs available

#### 8.2 Exposure controls

Appropriate engineering controls
Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits. All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in good condition and properly maintained. Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information contact your national organisation for standards. The final choice of protective equipment will depend upon a risk assessment. It is important to

				(Rest of World)		

### **SECTION 8: Exposure controls/personal protection**

• Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as well as a chemical) risk i.e. where there is abrasion or puncture potential.

Skin and bodyUse of protective clothing is good industrial practice.<br/>Personal protective equipment for the body should be selected based on the task being<br/>performed and the risks involved and should be approved by a specialist before handling this<br/>product.<br/>Cotton or polyester/cotton overalls will only provide protection against light superficial<br/>contamination that will not soak through to the skin. Overalls should be laundered on a regular<br/>basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a<br/>risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots<br/>will be required.Personal protective<br/>equipment (Pictograms)Image: Content of the task of the task of task of

Environmental exposure controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### **SECTION 9: Physical and chemical properties**

### 9.1 Information on basic physical and chemical properties

<u>Appearance</u>	
Physical state	Liquid.
Colour	Yellow. [Light]
Odour	Mild
Odour threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Pour point	-30 °C
Flash point	Closed cup: 210°C (410°F) [Pensky-Martens.] Open cup: 271°C (519.8°F) [Cleveland.]
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	Not available.
Density	<1000 kg/m³ (<1 g/cm³) at 15°C
Solubility(ies)	insoluble in water.
Partition coefficient: n-octanol/ water	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Kinematic: 150 mm²/s (150 cSt) at 40°C Kinematic: 17.8 mm²/s (17.8 cSt) at 100°C
Explosive properties	Not available.
Oxidising properties	Not available.

### 9.2 Other information

No additional information.

Product name	Alphasyn T 150		Product code	451120-FR01	Page: 6/10
Version 11. 02	Date of issue 12 December 2014	Format	Rest of World	Language	ENGLISH
			(Rest of World	)	

SECTION 10: Stability	and reactivity
10.1 Reactivity	No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.
10.2 Chemical stability	The product is stable.
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.
10.4 Conditions to avoid	Avoid all possible sources of ignition (spark or flame).
10.5 Incompatible materials	Reactive or incompatible with the following materials: oxidising materials.
10.6 Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

### **SECTION 11: Toxicological information**

### 11.1 Information on toxicological effects

### Acute toxicity estimates

### **SECTION 12: Ecological information**

#### 12.1 Toxicity

**Environmental hazards** 

Harmful to aquatic life with long lasting effects. Based on data available for this or related materials.

### 12.2 Persistence and degradability

Not expected to be rapidly degradable.

Product name	Alphasyn T 150		Product code 451120	)-FR01	Page: 7/10
Version 11. 02	Date of issue 12 December 2014	Format	Rest of World	Language	ENGLISH
02			(Rest of World)		

### **SECTION 12: Ecological information**

### 12.3 Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

Other ecological information	Spills may form a film on water surfaces causing physical damage to organisms. Oxygen transfer could also be impaired.
12.6 Other adverse effects	
vPvB	Not applicable.
PBT	Not applicable.
12.5 Results of PBT and vPvB	assessment
Mobility	Spillages may penetrate the soil causing ground water contamination.
12.4 Mobility in soil Soil/water partition coefficient (K <sub>oc</sub> )	Not available.

### **SECTION 13: Disposal considerations**

13.1 Waste treatment methods

#### Product

Methods of disposal

Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.

### Hazardous waste Yes. European waste catalogue (EWC)

Waste code	Waste designation	
13 02 06*	synthetic engine, gear and lubricating oils	
However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste		

However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste disposal code to be assigned by the end user.

#### **Packaging**

Methods of disposal

Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.

Waste code	European waste catalogue (EWC)
15 01 10*	packaging containing residues of or contaminated by dangerous substances
Special precautions	This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Empty containers represent a fire hazard as they may contain flammable product residues and vapour. Never weld, solder or braze empty containers. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
